

//Liquid Development

Technology, meet humanity.

BACKGROUND

Liquid Development is a Portland based design firm that creates content for next generation video games. They've been part of some of the most successful games of late, including Rock Star and Guitar Hero II.

THE SITUATION

Liquid Development works with designers all over the planet through an online content creation tool they call Pitcrew®. Pitcrew is a critical part of staying on deadline and meeting client expectations. Not only does Liquid Development require near 100% uptime, they need large amounts of file storage and the ability to push large graphical imagery across the web.

THE CUSTOMIZED SOLUTION

Liquid Development turned to Opus Interactive to put together a solution to meet their stringent demands. Opus Interactive provides managed web hosting and complete backup, email hosting with spam and virus filtration all with 100% uptime.

In addition, Liquid Development uses our QMOE (Qwest Metro Optical Ethernet) solution to provide increased bandwidth over disparate routes with greater reliability. This allows users of Pitcrew to pass large files from desktop to server to the internet fast and without bottlenecks.

"If the server went down it would shut our doors. It's what we rely on. It's how we get our work done. The staff at Opus Interactive is friendly, knowledgeable, and helpful; I trust that I will get the solutions and assistance I need whenever I reach out to them."

Tony Brinlee
Director of Information Technology,
Liquid Development

About Opus Interactive

Portland, Oregon based Opus Interactive is a full-service Managed Services Provider (MSP). Founded in 1994, the company provides managed hosting, dedicated virtual and standard servers, collocation, and hi-capacity Internet services. With its unique high-density data center model, advanced technology adoption, clean power utilization, and energy efficient hosting solutions, Opus Interactive works with organizations of all sizes helping them reduce IT infrastructure costs and consolidate their server footprint. They team with industry leading partners such as VMware, HP, LeftHand Networks, and Microsoft. Opus Interactive is an accredited member of the International Managed Services Provider Alliance.
