

If you are located in the Portland, Oregon or SW Washington area, we can provide you with DSL Broadband Internet Service through Qwest, Verizon, and CenturyTel. Opus Interactive provides reliable and secure high-speed business Internet connectivity at affordable prices. And, we back it all with an industry leading Service Level Agreement (SLA) that guarantees 100% uptime.

METRO OPTICAL ETHERNET (MOE)

Opus Interactive's Metro Optical Ethernet (MOE) service combines the power of Ethernet and optical technologies to provide scalable and secure bandwidth at speeds up to GigE at a relatively low cost. MOE provides location to location connectivity between two or more of your offices within a metro area.

- 3-5 MB connection up to GigE
- Fast and secure office-to-office connectivity
- More robust than bonded T1 connections
- Burstable bandwidth
- A great value

T1 LINES

A dedicated T1 is a business grade, reliable internet connection backed by our industry leading SLA. We offer point-to-point, ATM, and frame-relay-based T1 access connecting to our Portland data center, or point-to-point for inter-office connectivity.

- SLA backed connectivity
- Reliable and secure connectivity
- Location-to-location T1
- Up to 1.5 MB speeds
- Friendly (human) customer service

VIRTUAL PRIVATE NETWORK (VPN)

Our virtual private networks (VPN) are servers that are networked between nodes carried by the Internet or virtual circuits instead of by physical wires. VPN's can be used to separate the traffic of different user communities over an underlying network or used with strong security features, such as authentication or content encryption for more specialized traffic. Opus Interactive can use Cisco or GTA appliances to configure and build your VPN.

Secure traffic between physical office locations

Managed Cisco routers and firewalls

Safe, secure remote access

Onsite VPN experts

Affordable
