

In today's corporate environment, email is a business-critical application and we understand this. It's why we use IronPort® Systems – now part of Cisco Systems – to provide web and email spam and virus protection. IronPort has raised the bar with revolutionary anti-spam, anti-virus and anti-spyware technology that protects some of the world's most important networks.

Now we can offer carrier-grade platforms combined with powerful tools that enable simple management of complex tasks. We can provide security solutions that are deployed at the network gateway, creating a perimeter defense so powerful that Internet threats of all types never even make it to employees' desktops. Prices start at \$1.25/box and there are volume discounts, so contact us today.

- Top-notch protection against today's virus and phishing threats
- Increased employee productivity
- Protection and peace of mind from threats embedded in emails and through URLs
- Onsite expertise
- Flexible pricing and configurations – starting at \$1.25/box

RESELLER OPPORTUNITIES

Do you have clients that could use a strong spam and virus filtering solution? Take advantage of our reseller program for IronPort. You'll receive volume discounts, giving you the ability to make a little extra money – while providing your clients with the security and protection from Web threats they need. Contact us today to learn more and get started.
