

## //Dedicated Servers

If you're looking for a solution that demands more than a virtual server can provide, or your company requires a dedicated server, Opus Interactive offers state-of-the-art server solutions. When you rent a dedicated server with Opus Interactive, we'll build, maintain and monitor the hardware 24/7 in either a Windows or Linux environment.

Our dedicated server offerings are designed to give you the space and security you need in a utility-based pricing model. You'll save money on hardware depreciation and support costs without the large capital investment needed to purchase your own equipment. Our dedicated servers are housed in our Tier 3 Certified data center, and we use only the leading hosting technology providers, such as HP, Intel, LeftHand Networks, and Cisco.

### WEB SERVERS

Opus Interactive's web servers allow organizations a safe and secure way to manage their web based content and applications. We can provide you with all the space, security, power, cooling and connectivity required for your needs.

#### Top 5 Benefits/Features

- Maximum uptime backed by industry-leading SLAs
- Flexible web server configurations
- Secure, state-of-the-art, SAS 70 Certified data center
- Multiple platform support – Windows and \*nix
- Onsite certified, technical experts

### APP SERVERS

Opus Interactive's application servers are in an n-tier architecture server environment that allows third party applications to interface with web server front-ends and data base back-ends. Typical application servers hosted by Opus Interactive include those that run on Microsoft platforms using .NET Framework, such as Ektron, Sitefinity, Great Plains, SharePoint, and CRM, those that run on Java Platforms that can take advantage of JBoss and Tomcat, and those that run on open source (php) platforms, such as SugarCRM, Joomla, WordPress and others.

#### Top 5 Benefits/Features

- Windows or Linux ready
- Secure Middle Tier
- Increased application performance
- Onsite technology experts
- Secure, SAS 70 Certified data center

### DATABASE SERVERS

Opus Interactive Database servers provide you with highly available, high performance database solutions for Microsoft SQL, MySQL, PostgreSQL and Oracle. Fast, reliable and redundant solutions are customized for specific needs and uses. Quality hardware, firewall protection, virtualization, cloud clustering and other redundancy configurations work together to provide you the best solution for your data storage and delivery needs.

#### Top 5 Benefits/Features

- Fully customizable
- Flexible configurations
- State-of-the-art security
- Leverage the latest technology
- Maximum uptime and accessibility

### MAIL SERVERS

Email hosting services have become a must in the world today. Email hosting services are inherently different from typical email providers such as webmail sites like Gmail, Yahoo mail or Hotmail. Opus Interactive's dedicated email servers allow for premium email services like enterprise spam and virus filtering, MS Exchange hosting along with custom configurations for the small to large organization. In addition, we can manage your domain name, including any email authentication. Simply put... it's the email you wish you had without the spam, security concerns, and hassle.

#### Top 5 Benefits/Features

- Spam and virus filtering using Cisco IronPort™
- Commercial strength solution
- Complete domain management
- "Pay for what you use" pricing
- Onsite email experts and assistance
