

//Virtual Hosting Solutions

Opus Interactive is the only independently owned, Portland-based provider of virtualization solutions. Our onsite virtualization engineers can customize and configure a virtual hosting solution built to meet your individual hosting needs.

We offer;

- **Virtual Dedicated Servers (VDS)**
- **Virtual Private Servers (VPS)**
- **Virtual Private Data Center (VPDC)**

No matter how challenging your hosting needs may be, Opus Interactive can provide a solution to accommodate them. Our Virtual Servers are built on enterprise class HP Blade Servers, HP LeftHand Networks clustered storage and virtualization software from the leading industry providers. A multi-terabyte, redundant, storage network provides the space it needs to quickly deploy copies of virtual machines, on demand, for the rapid scalability of your infrastructure.

VIRTUAL DEDICATED SERVERS (VDS)

Opus Interactive can provide you with numerous configurations of a VDS designed for any hosting need. Our virtual dedicated servers, partitioned off of our computing environment, are the perfect bridge between our shared hosting platform and our dedicated managed servers. The VDS family is fully managed and gives you protection and independence from other customers and more affordable than a fully managed dedicated server with the same benefits.

VIRTUAL PRIVATE SERVERS (VPS)

Want to self-manage your virtual server solution? Opus Interactive provides both Microsoft Hyper-V and Open VZ solutions. Combine the many technology benefits that Opus Interactive has to offer with a private computing environment and you'll see why our VPS solutions are a great step up from shared hosting options

VIRTUAL PRIVATE DATA CENTER (VPDC)

Eliminate the need for datacenter co-location, private racks and managed hosting services by enabling users to assemble, deploy, monitor and manage all their infrastructure and applications using only a browser. Enjoy all of the benefits of Cloud computing – reduced hardware failure risk and access to on demand resources – with the added assurance of have your data stored in a private, secure environment. No need to worry about technology hardware or software, or the overhead needed to run and maintain them.

Are you a developping software applications? The Virtual Data Center is the perfect environment for you. We can turn almost any application into a SaaS offering (software-as-a-service), eliminating costly deployment and upkeep requirements. Leverage industry leading vCloud™ Director technology from VMware while managing all applications, servers and storage with a browser

Contact us today to learn more about Virtual Hosting Solutions and whether they're right for your business.

It's people who design, produce, use, support,
fix, upgrade and optimize technology.
And, without going into an IT telephony
conversation we are all about both.

Opus Interactive is dedicated to not only
providing the best technology and expertise,
but flexibility and individuality developing
customized solutions that serve the unique
personalities and needs of each client.

Technology, meet humanity.

//Virtual Hosting Solutions

VIRTUAL DEDICATED SERVERS

Starting at \$60/month

The VDS family is built with some of the best hosting technologies available in the industry, including VMware, HP Blade Servers, and HP LeftHand Networks clustered storage.

VDS – A great solution for a company looking to move from a shared hosting environment.

VDS² – Takes VDS to the next level by offering live migration technology. This high availability (HA) addition eliminates the hassles of maintenance windows and provides peace of mind with no server downtimes; a great deal starting at just \$99 per month.

VDS³ – Builds off of VDS² by providing an active/passive virtualization platform where the main server, set of servers, or the entire cluster is active and another set of servers exists in another location ready to take over the load in case of failure. The original servers can be rapidly migrated to a different physical location in the event of failure to minimize downtime. This solution includes site-to-site connectivity for data replication

and migration as well as inter-site communication. Call us today for custom pricing.

VDS – Continuing the evolution of our VDS offerings, VDS creates the ultimate in redundancy with an active/active virtualization solution where the server, servers, or entire cluster is replicated to two or more physical locations. Traffic is globally load balanced and spread across multiple solutions at the same time. Any failures would result in the redirection of traffic to an already active location that would handle the load until the failed site comes back online. This solution includes site-to-site connectivity for data replication and inter-site communication. Call us today for custom pricing.

VIRTUAL PRIVATE SERVERS (VPS)

Starting at \$40/month

Microsoft Hyper-V – Opus Interactive's Hyper-V virtual machine is a scalable, reliable self-managed Virtual Private Server (VPS). With Hyper-V from Opus Interactive, you'll have access to the proven provisioning control of WebSitePanel that allows you to manage physical and virtual resources from the web.

With Hyper-V from Opus Interactive, you'll also get the peace of mind that comes with backup/restore, snapshotting and the simple transition of virtual servers from one physical server to another, at an affordable price. You can provision this solution today for as little as \$40 per month.

OpenVZ – Opus Interactive's OpenVZ virtual machine is a container-based, self-managed Virtual Private Server (VPS) designed for a Linux environment.

OpenVZ offers flexibility, such as full root access and compartmentalized file systems, and is a great candidate for someone looking to move from a shared hosting platform to a private hosting environment. With a control panel to manage the state of your OpenVZ virtual server you will have the ability to host your web site or application with ease while maintaining control of your server.

VIRTUAL PRIVATE DATA CENTER (VPDC)

Starting at \$999/month

*Excludes maintenance windows
