

Cloud where you need, when you need, and how you need.

Opus Interactive offers a wide range of cloud solutions that are hosted on high-performance equipment and housed inside of Tier III+ data centers. Our cloud solutions are tailored to your unique needs to ensure you get the most out of your technology and budget.

- **OpusCloud & OpusCloud IaaS** are climate positive. Multi-tenant and dedicated IaaS solutions built for cost control, high security, high compliance, and reliable performance
- **VMC on AWS** is an enterprise class SDDC (with optimized access to 18 highly available regions on scalable AWS cloud & services)
- **Managed Public Cloud** offers full access to public cloud resources with engineers managing, monitoring, and optimizing environments
- **Cloud (Object) Storage** offers a cost effective solution for archived data that needs to be stored and accessed long term
- **Virtual Desktop Infrastructure** maximizes and secures telework solutions. Opus VDI delivers a virtual workspace environment managed from any device, anywhere, any time
- **Hybrid and Multi-Cloud Management** frees up your IT resources and expands expertise across extensive cloud products and services

Benefits of Opus Interactive's cloud and managed services

-  Tailored solutions for complex infrastructure needs
-  Technology agnostic with long-standing partnerships
-  HIPAA, PCI-DSS, ISO 27001 and SOC 2 compliance
-  Geographic diversity for high availability and heightened security

But wait. There's MORE! Explore our added services to strengthen your service delivery needs.

Hybrid & Multi-Cloud Monitoring

Our DISA- approved monitoring offering delivers full hybrid and multi cloud support. Get visibility of your entire cloud ecosystem - from on prem to public clouds - and power optimization with AI/ML predictive analytics.

Network Connectivity

Get the flexibility and control to design, deploy, and manage your applications the way you need. We give you the resources you need to get your workloads from on-prem to global as quickly and securely as needed.

Backup and Disaster Recovery

Backup servers and application data with flexible disaster recovery solutions that allow for various production environments. Tailored RTO and RPO will improve service levels and ensure the business continuity your workloads.

Get cloud hosting and managed services with Opus Interactive

Our service for cloud and managed services is a part of a broader hybrid and multi-cloud experience that we offer to deliver an end-to-end solution that is tailored to your organization's reliability and availability needs.

Efficient Operations

- Operational consistency across VMware clouds
- Leverage existing skills and familiar VMware tools
- Easy workload migration and portability
- IT ecosystem visibility with single-pane monitoring
- Right-sized solutions on high-efficient hardware

Security & Compliance

- Protect workloads from internal threats with Distributed Firewall services
- Optional security with encrypted storage services for data at rest
- FISMA High availability in Virginia and Texas
- HIPAA, PCI-DSS, ISO 27001, and SOC 2 compliant solutions

Storage & Continuity

- Fast, efficient VMware vSAN virtualized storage great for most workloads
- Scalable AWS S3 and S3 Compatible Object Storage for high volume data
- Tier storage with policies for cost-effectiveness
- Protection for business continuity with Backup and Disaster Recovery services

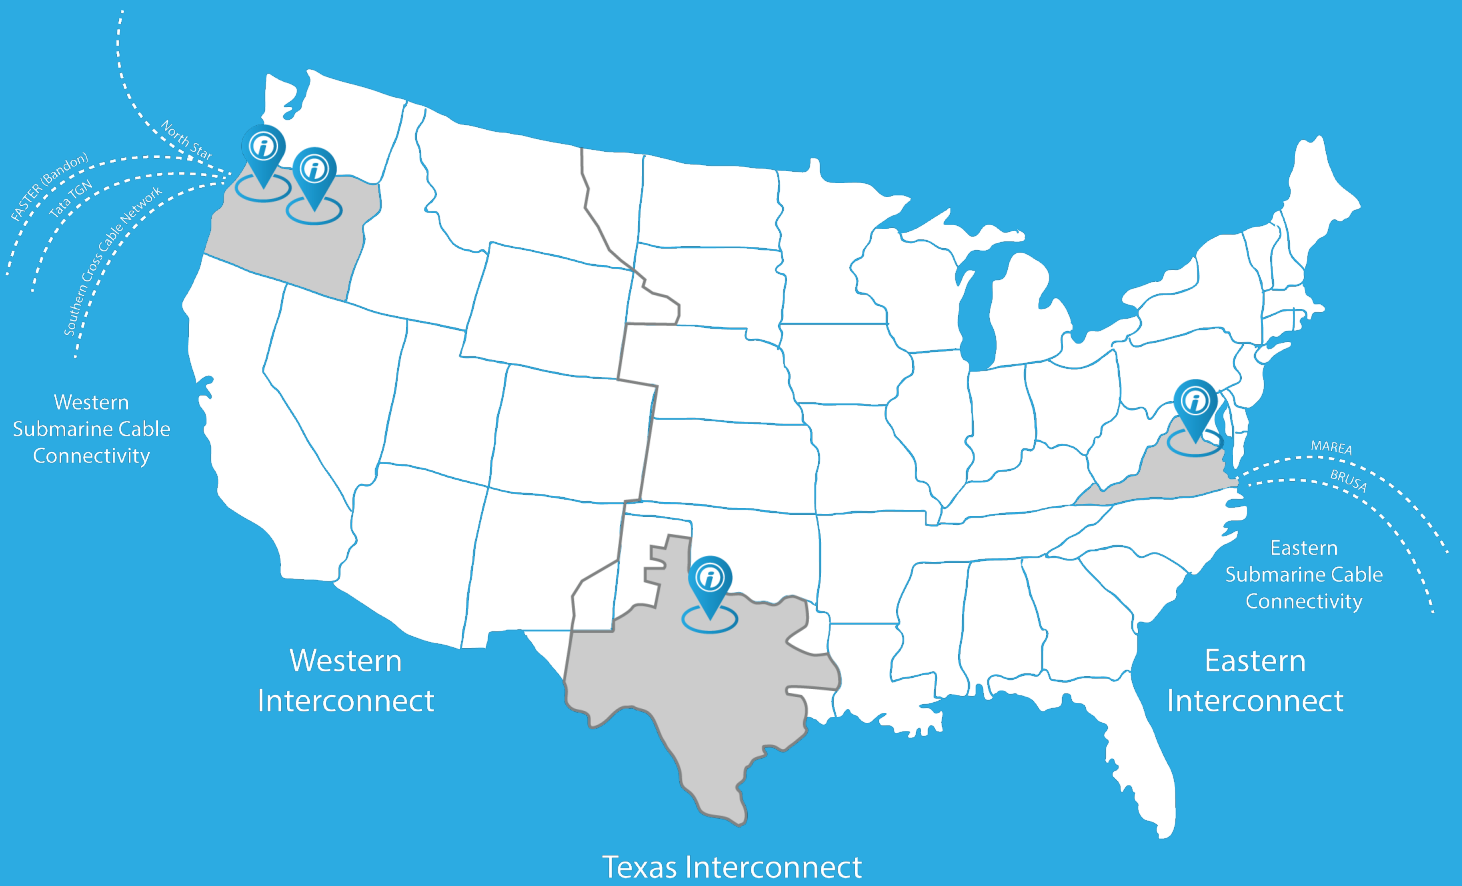

White Glove Support

- 100% uptime guarantees
- Opus Interactive Infrastructure, Datacenter and Network SLA
- 24/7/365 phone and live access to support
- NPS 9.409 / 95.6% Customer Satisfaction
- **No service contract fees**

We operate with integrity to help customers improve performance, reduce costs, and optimize resources. Founded in 1996, Opus Interactive delivers tailored cloud hosting and colocation services. Our right-sized solutions are compliant with PCI-DSS, HIPAA, ISO 27001, and SSAE 18 SOC 2 and delivered from Tier III+ data centers located in high connectivity markets (Hillsboro, Dallas, and Northern Virginia) - and backed by SLAs. Each facility partner is carefully selected for security, geographic redundancy, and efficiency to ensure end-to-end reliability and performance.

Opus Interactive is a woman and minority-owned enterprise with a passion for advancing women in tech, digital inclusion, STEM, and sustainable IT. With past performance that includes nearly 30 years of battle-tested results by bringing together solutions, compliance, and world class facilities, our end goal is optimized solutions that enable our customers to do great work. **Technology, meet Humanity.**
